Professional Summary

Computer Science Engineering student with experience in Python development, backend applications, machine learning, and data analytics through internships and real-world projects. Skilled in building AI-powered systems, predictive analytics solutions, and web applications using Python, Flask, SQL, and machine learning frameworks.

Education

B.S. Abdur Rahman Crescent Institute of Science and Technology 2022 – 2026
B.Tech in Computer Science Engineering — CGPA: 9.1 *Chennai, India*

Narayana Junior College 2020 – 2022
Intermediate (MPC) — Percentage: 93.6% *Tirupati, India*

Experience

IBeON Infotech June 2025 – July 2025
Machine Learning Intern

- Developed and deployed a loan default prediction web application using Python, Streamlit, and SQLite for intelligent risk analysis workflows.
- Built backend prediction modules, authentication features, and data handling pipelines for real-time user interaction.
- Performed data preprocessing, feature engineering, and model integration using Python and XGBoost.

Infosys Springboard 2025
Machine Learning Intern

- Developed ShipmentSure, a shipment delay prediction system integrating data analytics, Flask backend development, and automated alert generation.
- Implemented exploratory data analysis, feature engineering, and explainable AI techniques using SHAP for prediction transparency.
- Built interactive web modules for shipment monitoring, prediction workflows, and visualization dashboards.

Unified Mentor 2025
Data Analytics Intern

- Analyzed structured datasets using Python and visualization libraries to identify business trends and generate actionable insights.
- Performed data cleaning, exploratory analysis, and dashboard-oriented reporting using Pandas, Matplotlib, and Seaborn.

Projects

Skilligy – AI-Powered Interview Practice Platform | *Python, FastAPI, Whisper, OpenCV, MediaPipe*

- Developed a multimodal AI interview platform supporting text, voice, and video-based interview practice with automated evaluation and feedback generation.
- Built backend pipelines integrating speech-to-text, LLM-based evaluation, and computer vision-based behavioral analysis for interview performance assessment.

ShipmentSure – Intelligent Shipment Delay Prediction System | *Python, Flask, XGBoost, SHAP, SQLite*

- Developed an end-to-end shipment delay prediction system using XGBoost, feature engineering, exploratory data analysis, and SHAP explainability.
- Built a Flask-based web application with authentication, automated email alerts, and shipment prediction dashboards for logistics monitoring.

Climate Change Modeling Dashboard | *Python, Streamlit, NLP, SHAP*

- Developed an interactive climate analytics dashboard integrating sentiment analysis, CO_2 emission forecasting, and visualization modules.
- Built Streamlit-based interfaces for analytical reporting, forecasting, and real-time data visualization workflows.

Technical Skills

Languages: Python, C++, JavaScript, SQL
Libraries & Tools: Flask, Pandas, NumPy, Scikit-learn, OpenCV, MediaPipe, SHAP, Matplotlib, Seaborn
Web Technologies: HTML, CSS, REST APIs
Databases: MySQL, SQLite
Platforms: Git, VS Code, Jupyter Notebook, Streamlit
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS

Certifications & Achievements

- Completed AI & Machine Learning course through Infosys Springboard.
- Participated in Smart India Hackathon (SIH), contributing to solution design and technical problem analysis.
- Won Poster Presentation competition for effective technical presentation.
